(The disguise of the 1st factor exhibits the Escapist providing "an immortal haymaker" onto the Führer's realistically bloody jaw.) In next years, the Escapist and his superhero allies tackle the evil Iron Chain and their chief Attila Haxoff--their battles drawn with an depth that grows extra traumatic as Joe's efforts to rescue his kin fail. he is battling their battle with brush and ink, Joe thinks, and the assumption sustains him lengthy sufficient to satisfy the attractive Rosa Saks, a surrealist artist and unusually retrograde muse. but if even that fiction fails him, Joe plays an get away of his own, leaving Rosa and Sammy to select up the items in a few more and more wrong-headed ways. extra remarkable adventures follow--but reader, why smash the fun?
