Bob Shaw

From Kirkus Reviews Revised version of a 1969 paperback from the Belfast-born British resident writer of The Shadow Of Heaven darkish evening in Toyland, The Peace Machine, etc. within the twenty first century, an unknown enemy has dusted the world's croplands with deadly herbicides. With the oceans the single resource The Shadow Of Heaven of food, populations have focused alongside the coasts; one overcrowded urban stretches from Maine to Florida. Supplementing the meager marine invoice of fare are greens produced by way of robots on platforms, or Iles, suspended 5 kilometers on excessive by means of antigravity machines. whilst journalist Vic Stirling's half-brother Johnny Considine is going missing, Stirling lines him to the Ile referred to as Heaven. Here, Stirling discovers a ragged society of misfits, governed via Johnny and scavenging one of the robots and crops--some smart gizmos preserve the air in and the temperature up, you see. energy struggles ensue--above (between Stirling and Johnny) and under (between the govt. and the strong foodstuff expertise Authority). Threatened by means of FTA troops, Johnny prepares grandiose schemes to fly Heaven off to The Shadow Of Heaven the moon. Eventually, Stirling may help the govt vanquish either Johnny and the FTA, and start making plans for a fleet of Iles to begin the terraforming of Venus. difficult to swallow, sometimes, with too many unbelievable gadgets; otherwise, professionally burnished if greater than a tad stolid. -- Copyright ©1993, Kirkus Associates, LP. Post-salting of the Earth apocalypse, the area all lives on the oceans' edge, and farms and procedures plankton for sustenance. a couple of plots of land are suspended on anti-grav structures floating above the ocean for robo-farmers to complement the plankton. a few claustrophobic fogeys break out to the islands within the sky (Heaven), to stay an open and loose foraging existence. while a newspaper reporter discovers his half-brother has long gone missing, he reveals the path resulting in the sky islands... and (view spoiler)[sets in movement a plan to convey down the govt and finally populate the sun method (hide spoiler)]. I cherished the cliffhanger feedback on the finish of chapters which are then totally disregarded by way of the start of the subsequent chapter, and the results hardly ever even pointed out back (with simply enough information to suss them out). The 'ink-stained-wretch' reporter protagonist used to be additionally a enjoyable trope for me to read, commonly simply because The Shadow Of Heaven I persist with a couple of reporters' own blogs and imagine information reporting is important. There have been loads of 'are we actually family' psychology matters among the half-brothers, which i did not relate with. most eldritch part of this was once major personality marrying his half-brother's spouse on the finish of the book--roles for girls have been stereotypes: mother, daughter, wife-to-be. not one of the characters used to be too attention-grabbing or good developed. i do not believe i've got the other books by means of this author, The Shadow Of Heaven so i'm going to no longer be interpreting him too soon... unusually (for my tastes) i believe i might like this writer greater as a short-story writer--I did not see a lot personality improvement yet loved the writing type otherwise.
